

Paul Ferraro

Vice President Seapower Capability
Systems, Raytheon Integrated Defense Systems

Panel B4

**European Naval Cooperation – how to shape
European Navies for tomorrow?**

Wednesday, 28th November 2018, 11:45 – 13:15 h

Paul Ferraro is vice president of Raytheon Integrated Defense Systems (IDS) Seapower Capability Systems, the company's business area focused on programs for U.S. and international Navy customers. In this role, Ferraro leads a business focused on program execution, business growth, and the highest level of customer satisfaction. Prior to being named to his current position, Ferraro was vice president of Raytheon Advanced Technology Programs as well as vice president of the Network Centric Systems' (NCS) Engineering and Technology organization. He also served as director of Electrical Design, leading a dispersed, 1,100-person organization responsible for electrical engineering design, development, testing and support for all IDS programs. As an integrated product team (IPT) lead, he was responsible for technical and programmatic oversight during the initial design phase of the External Communications IPT on the Zumwalt Class Destroyer program. Ferraro holds both bachelor and master's degrees in electrical and computer engineering from the University of Massachusetts, Amherst, and a master's degree in business administration from the Boston University Executive MBA program.
