**Multinational Air Power – how to increase
operational readiness to counter international
threats?**

Wednesday, 27th November 2019, 11:45 – 13:15 h

Celia graduated from the University of the Bilbao Chamber of Commerce with a Bachelor's Degree in Technical Engineering in Industrial Economy and Organisation in 2001.

With effect of April 1st 2018, Celia Pelaz was appointed as the Head of HENSOLDT's "Spectrum Dominance & Airborne Solutions" Division, after having served as the Head of Strategic Business Development, which includes the areas of Strategy, Communications, International and M&A operations.

Celia started her carrier as a System Engineer and her background extends to a sound operational and international career in different leadership positions as Program, Project, Bid and Sales Manager in the area of Defence & Security Electronics and Solutions.

Having led the Transformation Programme for the creation of the Electronics Business Line within Airbus Defence and Space in 2014, Celia also counts on solid experience in managing programmes of change and business transformation.
